SUMMARY

Software engineer with seven years building and operating web systems for telecom and financial services customers across Sudan and the Gulf. Most of my work is server-side Python, with enough frontend and infrastructure to carry a feature from database schema through to production.

EXPERIENCE

Senior Software Engineer, Sudatel Telecom - Khartoum (2022 to present)
Designed and built REST APIs with Django and Django REST Framework serving around forty thousand daily active subscribers on the self-service portal
Rewrote the prepaid billing reconciliation job, cutting its nightly runtime from just over four hours down to twenty minutes
Modelled the subscription and invoicing schema in PostgreSQL and added the partial indexes that removed the three slowest queries from the dashboard
Introduced continuous integration with GitHub Actions running the full test suite and linting on every pull request before merge
Led the migration from a single virtual machine to containerised deployments with Docker Compose, including the rollback procedure
Mentored three junior engineers through structured code review

Software Engineer, Bank of Khartoum - Khartoum (2019 to 2022)
Built internal reporting services in Python consumed by the branch network
Wrote the integration layer against a legacy SOAP core banking system and wrapped it behind a clean HTTP interface the rest of the estate could use
Added automated regression tests around the money transfer flow after a production incident, raising coverage on that module from 20% to 85%
Ran database maintenance and query tuning on PostgreSQL replicas

Junior Developer, Freelance - Khartoum (2018 to 2019)
Delivered small business websites and a stock-tracking tool for a pharmacy
Built customer-facing pages with React and a Django backend

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, some Go
Frameworks: Django, Django REST Framework, Flask, React
Databases: PostgreSQL, SQLite, Redis for caching
Infrastructure: Docker, GitHub Actions, Nginx, Linux administration
Practices: automated testing, code review, continuous integration, Agile

EDUCATION

BSc Computer Science, University of Khartoum (2018)
Graduated with honours; final year project was a bus routing application

LANGUAGES

Arabic - native speaker

English - full professional proficiency
